Kittenbot LEGO compatible case for Robot:bit
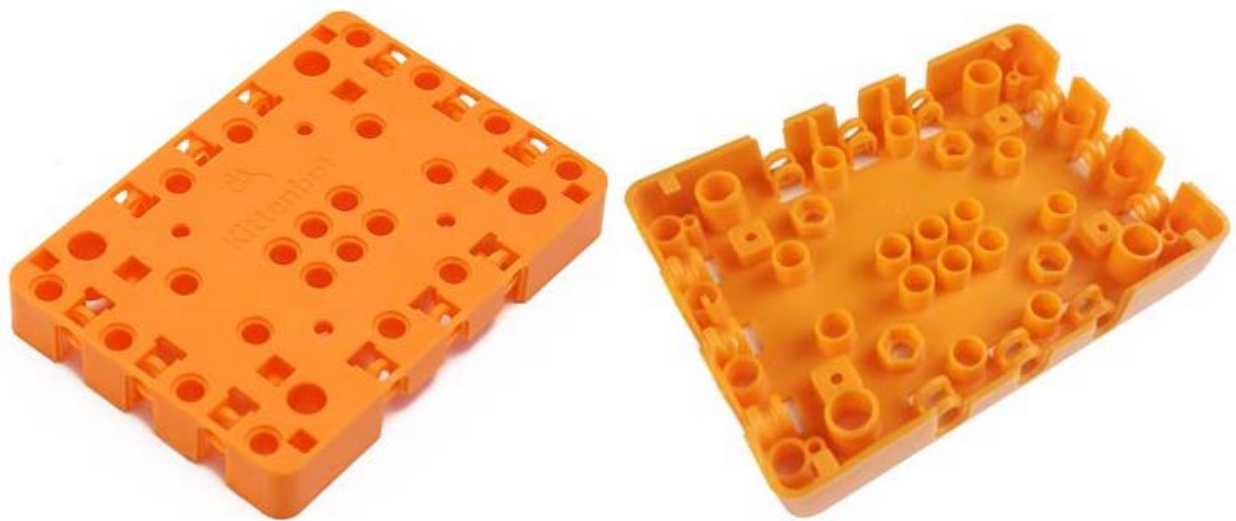

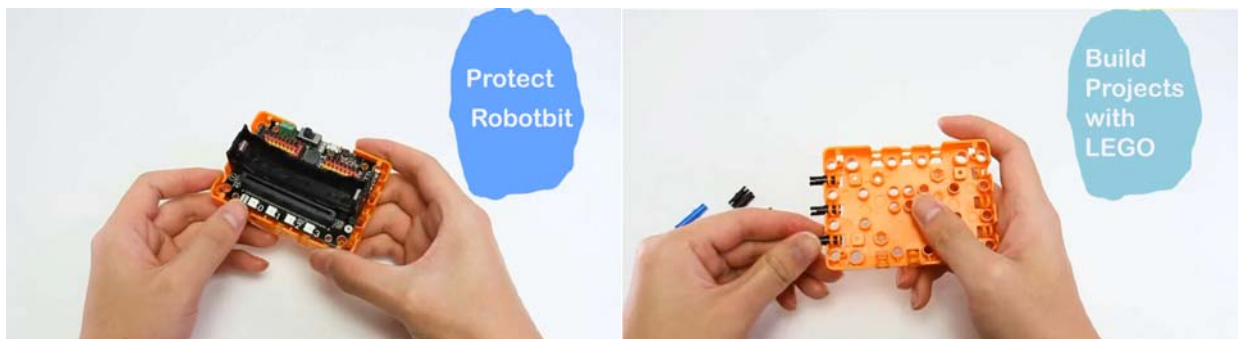

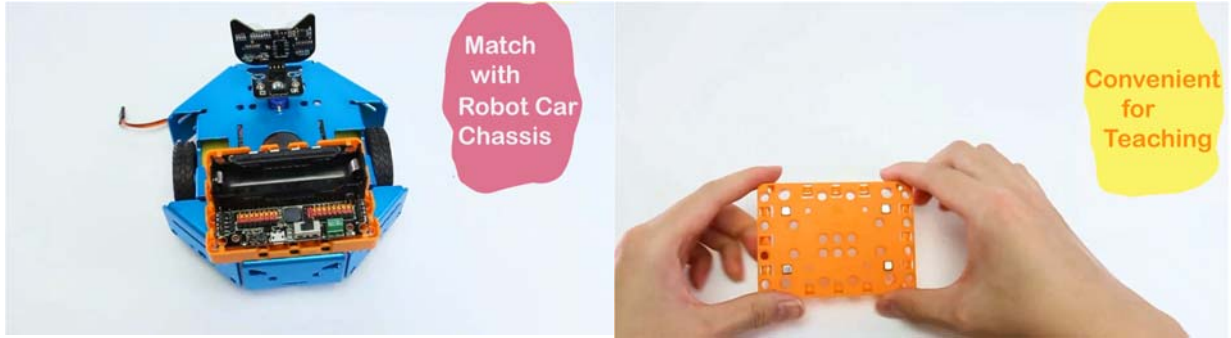

SKU 114070041

This is a LEGO compatible bottom case specially designed for Robotbit(expansion board for micro:bit). Not just a protection, much more interesting projects can be built through the case and LEGO.

- perfect protection for robotbit, make it more durable.
- standard holes for LEGO building, free your imagination
- match with robot car chassis, quick disassembling
- square hole designed for magnet, teaching is more convenient

Match with Robot Car Chassis

Convenient for Teaching
