Alligator Clip with Pigtail

This 4 pack of wires that are pre-terminated with an alligator (crocodile) clip on one end and a male jumper connector on the other. Each Alligator Clip with Pigtail cable has a male pin that easily inserts into a standard 0.1" connector. Each pack consists of two red cables and two black cables.

These connector wires can also be used to connect a BBC micro:bit to a prototyping board as an alternative to an edge connector.

Features

- Wires with a croc clip on one end and a male jumper cable connector (pigtail) on the other.
- Enables you to connect a BBC micro:bit to a prototyping board as an alternative to using an edge connector.

Contents

- 2 x Red alligator to male jumper connector leads.
- 2 x Black alligator to male jumper connector leads.

Dimensions

- Length: 30cm.
