USB A Jack to Micro USB B Jack Round Panel Mount Adapter

Product ID: 4214

Description

If you need to add a panel-mount connection for Micro USB, but don't have the time or ability to cut a custom oval or square hole, this USB A Jack to Micro USB B Jack Round Panel Mount Plug is the easiest and fastest way to panel-ify your existing kit. It's about 30mm in diameter, so you can drill a hole in your wood, plastic or metal with a common hole-saw or bit, no special shapes or filing required. Un-screw the plastic nut, insert the plug and re-attach. Ta-da! Now you have a USB A Jack to Micro USB B Jack sockets on either side for connecting any cable.

This one in particular is for USB Host applications.

It's designed to easily attach to a panel up to 16mm thick (or 0.625"), or as thin as a few mm. Perfect for adding a standard USB A port to your project enclosure! We like this plug in particular for its solid body and 'forgiving' plastic lip that hides the drill hole.

Technical Details

- Overall length: approx 32.4mm
- Diameter: 30mm
