

## NVIDIA Jetbot Parts Pack PRODUCT ID: 4225

The Jetbot Parts Pack is everything you need to get your next *vroom vroom* project up and rolling!

Includes our popular DC Motor + Stepper FeatherWing which will let you use 2 x brushed DC motors with I2C control. You also get two wheels with grippy tires, to match.

The Adafruit 128x32 PiOLED is your little OLED pal, ready to snap onto your Jetson computer, to give you a little display. The PiOLED comes with a monochrome 128x32 OLED, with sharp white pixels. Some right angle header makes it easy to mount for high visibility.

Includes:

- 1 x Adafruit DC Motor + Stepper FeatherWing Add-on For All Feather Boards
- 1 x Adafruit PiOLED – 128x32 Monochrome OLED Add-on for Raspberry Pi
- 5 x Break-away 0.1" 2x36-pin Right-Angle Male Headers
- 2 x DC Gearbox Motors – "TT Motors" – 200RPM – 3 to 6VDC
- 2 x Skinny TT Motor Wheels – 60mm Diameter

Jetson Nano and 3D printed case not included, for more info on how to build the JetBot check out the guide/tutorial from NVIDIA
