Black LED Diffusion Acrylic Panel 12" x 12" – 0.1" / 2.6mm thick

PRODUCT ID: 4594

A nice whoppin' slab of some lovely black acrylic to add some extra diffusion to your LED Matrix project. This material is 2.6mm (0.1") thick and is made of special cast acrylic that makes it perfect for glowy projects, especially matricies or NeoPixels.

Unlike smoke or other-tinted acrylic, this material sharpens the pixels, and reduces the glare. You get a great looking display, all colors are vivid and readable indoors and out!

We give you a 12" x 12" piece, you can score or laser cut it down to any custom shape you need, works great in laser cutters – treat it like any other acrylic.

Note: This is just a sheet of acrylic panel, no mounting equipment or LED matrices are included.
