

7060 Staticide® Polyester Knit Swab

Reliable Precision Cleaning

ACL's Polyester Knit Swab is ideal for environments that need critical cleaning and durability. Constructed of double-layer polyester knit, the elongated tip removes IPA, acetone, and other solvents from tight crevices and hard-to-reach places.

This non-abrasive, lint-free swab is low in fiber NVR, ion content, and particulate generation. The swab's robust material can withstand agitation and is compatible with most solvents and flux removers. It can be used for cleaning validation and preventing cross contamination.

Product# 7060

Ideal for the following applications:

- Medical device manufacturing and assembly
- Electronics manufacturing and assembly
- Biology, chemistry, and environmental labs
- Forensics
- Hospitals

FEATURES:

- ❖ **Class 10 laundered and packaged**
- ❖ **ISO Class 4-5 compatible**
- ❖ **Absorbent**
- ❖ **Ultra-low particle**
- ❖ **Free of silicon, amides, and DOP contamination**
- ❖ **Double-layer polyester knit tip**
- ❖ **Rigid polypropylene handle**

Product# 7060: 6" swab with elongated tip
Tip: 0.65" x 0.264"
Handle: Semi-flexible 5.7"

100 swabs per bag / 10 bags per case
