

A-BASE ANTENNAS

VHF/UHF/700-800 MHz/2400 MHz

Our ongoing commitment to refinement in mechanical and electrical design has resulted in the most technically advanced mobile antennas on the market. Exclusive features such as stainless-steel whips, housings constructed with ABS material injected molded around a solid brass insert, and gold-plated push pin contacts make Laird the obvious choice for quality and long-lasting value for demanding mobile radio communications.

FEATURES AND BENEFITS

- All featuring NMO mounts for rapid deployment and reliable performance
- Exclusive gold-plated push-pin contact provides the most corrosion resistance and power transfer over time
- Long tuning ferrule allows for greater freedom in frequency adjustment without trimming
- Stainless-steel corona ball stays on the rod; no dissimilar metal interaction associated with competitor designs
