Track & Trace

Precision Reality provides an end-to-end Track & Trace solution to build a future-proof communication backbone to serve your facility for years to come. Using a mesh anchor with reliable and precise positioning technology, Precision Reality offers real-time asset intelligence on your high value assets including inventory, equipment, vehicles, and more. Network kits are designed with scalability in mind, creating limited disruption to your business with maximum ROI. Precision Reality delivers support start to finish, from installation to dashboard set-up ensuring success to get your network live and your data flowing.

Asset Tag

• Balance Asset Usage

• Negotiate Activity Based Maintenance Contracts

• Optimize Layouts for Efficient Traffic Patterns, Productivity and Cleaning Schedules

• Show Real-Time Presence & Dwell Time

• Generate Monthly Reporting on Asset Movement (or lack thereof)

• Reduce Shrinkage and Integrate with Inventory Management Software

• Minimize Time to Locate Tagged Items

• Create Geofences to Get Location Based Alerts

Specifications

Part Number	DMTGWPWMBTXX
Dimensions	Approx. 4 x 1 x 1"
Weight	Approx. 30g
Temperature Range	-40C - +85C
Frequency	2.4GHz
Protocols	BLE/Wirepas
Antenna	Embedded
Certifications	FCC
Sensors	Temperature, Humidity, Accelerometer
