

AUTOPRINT-300®

AUTOPRINT-300® Print Mechanisms are a combination of LABELMATE USA's well-known Reel-to-Reel Counting units with the Markoprint X1JET print head. These units can print an entire roll of labels in less than 5 minutes with a resolution of 300 DPI. The maximum print height is 0.5" (12.7-mm). AUTOPRINT-300® is the ideal machine for adding variable data to pre-printed labels at low cost and high speed.
