USB PS/2 Adapter A Type Male to PS/2 Female (G08-210)

Product Overview

USB PS/2 Adapter A Type Male to PS/2 Female.

This is the perfect adapter for users who want to convert PS/2 keyboard or mouse into USB port as long as the PC can recognize the PS/2 signals in its USB port.

There is no software driver required.

*****Note: The adapter only functions with items that recognize both USB AND PS/2 signals. If item is not compatible with both USB AND PS/2 signal types, please refer to G08-213, which has the "intelligence" to overide this situation.
