

# HAG01 SERIES

# POWER RELAY

File No.:E75887

File No.:R 50471143

## FEATURES

- High capacity: Max. switching current 160A
- SPDM contact configuration with large contact gap 3.0mm
- Coil holding voltage can be reduced to 50~55% V of the nominal coil voltage for saving energy

## CONTACT RATINGS

|                            |   |
|----------------------------|---|
| Contact Arrangement        | 1A  |
| Contact Resistance         | Max.10mΩ (by voltage drop 6VDC 20A)   |
| Contact Material           | AgSnO   |
| Contact Rating (Resistive) | Making 40A<br>Carrying 140A<br>Breaking 40A/400VAC, 85°C                      |
| Max. Switching Voltage     | 800VAC  |
| Max. Switching Current     | 160A  |
| Max. Switching Power       | 48000VA   |
| Mechanical Life            | 1×10 <sup>6</sup> operations  |
| Electrical Life            | Making 40A, Carrying 140A,<br>Breaking 40A,<br>On 1s/Off 9s, at 85°C, 50K OPS |

## CHARACTERISTICS

|                               |                         |   |
|-------------------------------|-------------------------|---|
| Insulation Resistance         |                         | 1000MΩ (at 500VDC)  |
| Dielectric Strength           | Between coil & contacts | 5000VAC 1min  |
|                               | Between open contacts   | 2000VAC 1min  |
| Surge Voltage                 |                         | 10kV(1.2/50μs)  |
| Operate time (at nomi. volt.) |                         | ≤30ms   |
| Release time (at nomi. volt.) |                         | ≤10ms   |
| Humidity                      |                         | 5%~85% RH   |
| Operation temperature         |                         | -40°C~+85°C   |
| Shock Resistance              | Functional              | 98m/s <sup>2</sup>  |
|                               | Destructive             | 980m/s <sup>2</sup>   |
| Vibration resistance          |                         | 10Hz ~ 55Hz 1.5mm DA  |
| Unit weight                   |                         | Approx. 130g  |
| Construction                  |                         | Sealed Type Washable, Sealed Type<br>Dust Cover Type, Flux Tight Type |

Notes: The data shown above are initial values.

**This datasheet is for customers' reference. All the specifications are subject to change without notice.**

## ORDERING INFORMATION

Notes:

1. PC board assembled with dust cover type and flux tight type relays can not be washed and/or coated.
2. Dust cover type and flux tight type relays can not be used in the environment with dust, or H<sub>2</sub>S, SO<sub>2</sub>, NO<sub>2</sub> or similar gaseous environment etc.

## COIL DATA

at 25°C

| Nominal Voltage VDC | Operate Voltage (Max.) VDC | Release Voltage (Min.) VDC | *Max. Allowable Voltage VDC | Coil Resistance Ω±10% |
|---------------------|----------------------------|----------------------------|-----------------------------|-----------------------|
| 6                   | 4.50                       | 0.30                       | 6.60                        | 14.4                  |
| 9                   | 6.75                       | 0.45                       | 9.90                        | 32.4                  |
| 12                  | 9.00                       | 0.60                       | 13.20                       | 57.6                  |
| 24                  | 18.00                      | 1.20                       | 26.40                       | 230.4                 |

Note:\*\*Max Allowable Voltage\*: The relay coil can endure max allowable voltage for a short period time only.

## COIL

|                 |   |
|-----------------|---|
| Coil Power      | Approx. 2.5W  |
| Holding Voltage | 40% to 100% Un (at 25°C)<br>50% to 60% Un (at 85°C) |

- Notes: 1) The coil holding voltage applied to coil 100ms after the rated voltage.  
2) To avoid overheating and burning, the coil can not be consistently applied to with voltage larger than maximum holding voltage.

This datasheet is for customers' reference. All the specifications are subject to change without notice.

## PACKAGING SPECIFICATION

| BLISTER BOX | OUTER CARTON | OUTER CARTON SIZE    |
|-------------|--------------|----------------------|
| 9PCS        | 54PCS        | L455mm*W220mm*H185mm |

## APPLICATION GUIDELINES

### Automatic Soldering

- \* Flow solder is the optimum method for soldering.
- \* Adjust the level of solder so that it does not overflow onto the top of the PC board.
- \* Unless otherwise specified, solder under the following conditions depending on the type of relay.

| Preheat time<br>20°C-100°C | Rising slope<br>20°C-120°C | Decreasing slope<br>Peak-150°C | Welding temperature<br>255°C-265°C |
|----------------------------|----------------------------|--------------------------------|------------------------------------|
| 90±5 seconds               | < 3°C/s                    | < 4°C/s                        | 3~5s                               |

### Hand Soldering

- \* Keep the tip of the soldering iron clean.

|                      |                          |
|----------------------|--------------------------|
| Solder Iron          | 30W or 60W               |
| Iron Tip Temperature | Approx. 350°C 662°F      |
| Solder Time          | Within approx. 3 seconds |

- \* Immediate air cooling is recommended to prevent deterioration of the relay and surrounding parts due to soldering heat.
- \* Although the sealed type relay can be cleaned, avoid immersing the relay into cold liquid (such as washing solvent) immediately after soldering. Doing so may deteriorate the sealing performance.

### Discard the dropped product
