

LUXEON MX

Unmatched performance in a proven package

LUXEON MX is a high power emitter enabling cost effective, high reliability fixtures for High Bay and Outdoor applications requiring system efficiency of up to 157 lm/W. This breakthrough LED provides double the flux compared to previous generations with an even more robust high power design. Designed to be optically compatible with LUXEON M, LUXEON MX enables luminaire manufacturers to instantly upgrade their systems to market leading efficiency without investing design resources.

FEATURES AND BENEFITS

- 2,000 lumens at 130 lm/W enables cost effective 100 lm/W fixtures
- 1,200 lumens at 150 lm/W enables high performance 120 lm/W fixtures
- Double the flux vs. comparable emitters in 120 lm/W systems
- More robust package for improved reliability at higher drive currents
- Same footprint and optically compatible with LUXEON M for an instant upgrade

PRIMARY APPLICATIONS

- High Bay & Low Bay
 - Industrial
- Outdoor
 - Streetlights

General Product Information

Product Test Conditions

LUXEON MX LEDs are tested and binned with a DC drive current specified below at a junction temperature, T_j , of 85°C:

700mA	-	LUXEON MX 12V
1400mA	-	LUXEON MX 6V
2800mA	-	LUXEON MX 3V

Part Number Nomenclature

Part numbers for LUXEON MX follow the convention below:

L 1 M X - **A A B B C C C D E E E E 0**

Where:

- A A** - designates CCT (40=4000K, 50=5000K, 57=5700K, 65=6500K)
- B B** - designates minimum CRI (70=70CRI, 80=80CRI, 90=90CRI)
- C C C** - designates voltage (12V=12V, 06V=6V, 03V=3V)
- D** - designates color (0=full distribution, 3=3-step, 5=5-step, 7=7-step)
- E E E E** - designates minimum luminous flux (optional)

Therefore, the following part number is used for a LUXEON MX 4000K 70CRI, 12V full distribution LED:

L 1 M X - **4 0 7 0 1 2 V 0 0 0 0 0 0**

Lumen Maintenance

Please contact your local Sales Representative or Lumileds Technical Solutions Manager for more information about the long-term performance of this product.

Environmental Compliance

Lumileds LLC is committed to providing environmentally friendly products to the solid-state lighting market. LUXEON MX is compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS Directive 2011/65/EU and REACH Regulation (EC) 1907/2006. Lumileds LLC will not intentionally add the following restricted materials to its products: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

Soldering Temperature	JEDEC 020D 250°C
Allowable Reflow Cycles	3
Reverse Voltage (V _{reverse})	LUXEON LEDs are not designed to be driven in reverse bias

Notes for Table 4:

- Proper current derating must be observed to maintain the junction temperature below the maximum allowable junction temperature.
- Residual periodic variations due to power conversion from alternating current (AC) to direct current (DC), also called "ripple," are acceptable if the following conditions are met:
 - The frequency of the ripple current is 100Hz or higher
 - The average current for each cycle does not exceed the maximum allowable DC forward current
 - The maximum amplitude of the ripple does not exceed the maximum peak pulsed forward current
- At 10% duty cycle with pulse width of 10ms.

Product Bin and Labeling Definitions

Decoding Product Bin Labeling

In the manufacturing of semiconductor products, there are variations in performance around the average values given in the technical datasheet. For this reason, Lumileds bins LED components for luminous flux or radiometric power, color point, peak or dominant wavelength and forward voltage.

LUXEON MX LEDs are labeled using a 4-digit alphanumeric CAT code following the format below:

A B C D

Where:

- A** – designates luminous flux bin (example: M=630 to 680 lumens, T=970 to 1040 lumens)
- B** – designates correlated color temperature (CCT) bin (example: 1=6500K, 2=5700K, 3=5000K, 5=4000K)
- C** – designates color bin (example: 3=3-step, 5=5-step, 7=7-step)
- D** – designates forward voltage bin (example: F=10.50 to 11.00V, G=11.00 to 11.50V)

Therefore, a LUXEON MX 12V with a lumen range of 630 to 680, color bin of 4000K, 5-step MacAdam ellipse and a forward voltage range of 10.50 to 11.00V has the following CAT code:

M 5 5 F

Luminous Flux Bins

Table 5 lists the standard luminous flux bins for LUXEON MX emitters. Although several bins are outlined, product availability in a particular bin varies by production run and by product performance. Not all bins are available in all CCTs.

About Lumileds

Companies developing automotive, mobile, IoT and illumination lighting applications need a partner who can collaborate with them to push the boundaries of light. With over 100 years of inventions and industry firsts, Lumileds is a global lighting solutions company that helps customers around the world deliver differentiated solutions to gain and maintain a competitive edge. As the inventor of Xenon technology, a pioneer in halogen lighting and the leader in high performance LEDs, Lumileds builds innovation, quality and reliability into its technology, products and every customer engagement. Together with its customers, Lumileds is making the world better, safer, more beautiful—with light.
