LED machine light, 24 V DC, Neutral white, emission angle: 50 °, length: 365 mm, M12 connector, degree of protection: IP67, can be switched in series, Dimming, Flash mode, resistant to coolants and lubricants, including mounting accessories

Product description

The LED light is designed to provide illumination inside or on machinery. M12 sensor/actuator cables enable multiple lights to be connected one after the other and to be switched on and off via the light interface, dimmed continuously, and operated in flash mode. In addition, the integrated high-quality optics prevent glare for the machine operator.

Your advantages

- Two PWM inputs for dimming and flash mode
- Error indication via digital output
- Protection against polarity reversal, excessively high supply voltage, and overtemperature
- Laminated safety glass enables use even in environments with potential mechanical strain
- Particularly economical thanks to energy-efficient LED technology and an LED service life of at least 50 000 h
- Can be switched in series via sensor/actuator cables with SPEEDCON M12 rapid interlock system
- Focused illumination, thanks to 50° emission angle
- Homogenous and glare-free lighting thanks to innovative optics
