Lattice Semiconductor: The Low Power Programmable Leader

Lattice sensAl™ Solution Stack

Accelerate Integration of Flexible, Ultra Low Power Inferencing

With solutions optimized for ultra low power consumption (under 1 mW - 1 W), small package size (5.5 mm² - 100 mm²), customizable performance and accuracy, and interface flexibility (MIPI CSI-2, LVDS, GigE, etc.), the Lattice sensAI stack accelerates integration of scalable, always-on, on-device AI.

Lattice mVision™ Solution Stack

Accelerate Implementation of Low Power Embedded Vision Applications

With solutions optimized for low power consumption ranging from under 150 mW to 1 W and small package size (2.5 x 2.5 mm to 10 x 10 mm) the Lattice mVision solution stack provides customizable performance and flexible interface connectivity (MIPI CSI-2, LVDS, PCIe, GigE, etc.). Lattice's mVision solution stack accelerates the integration of scalable Embedded Vision solutions for Smart Factory, Machine Vision, Smart City, and Smart Home applications.

Lattice Sentry™ Solution Stack

Software Solution for Platform Firmware Resiliency (PFR) Root of Trust

The Lattice Sentry solution stack consists of a complete reference platform, fully validated IP building blocks, easy to use FPGA design tools, reference design/demonstrations, as well as a network of custom design services. In many instances, a fully functioning PFR solution can be developed by modifying the included RISC-V C source code.

Lattice Automate™ Solution Stack

Lattice Automate helps designers accelerate high performance, low power, secure solutions for next generation factory automation solutions. The stack includes modular hardware development boards and software-programmable reference designs and demos that simplify and accelerate implementation of applications like robotics, scalable multi-channel motor control with predictive maintenance, and real-time industrial networking.

Lattice SupplyGuard™

End-to-End Supply Chain Protection Service

The Lattice SupplyGuard™ service provides customers with factory-locked ICs. These ICs can only be programmed using a configuration bitstream which has been developed, signed and encrypted by the intended customer. The solution is designed to provide protection against counterfeiting, over-building, malware insertion and IP theft.

General Purpose FPGAs

Low Power FPGAs (CertusPro-NX, Certus-NX, ECP, and LatticeXP2 families)

Addresses a broad range of connectivity and acceleration applications across multiple markets.

- Lowest power and smallest package with up to 10G SERDES and 100K LCs
- Industry-leading reliability and efficient processing (with class-leading on-chip memory and LPDDR4 support)

Specialized Families Tailored For Specific Needs

Video Connectivity FPGAs (CrossLink Families)

Optimized for high speed video and sensor applications

- First FPGA with hardened MIPI D-PHY
- Highest performance at lowest power

Ultra Low Power FPGAs (iCE40 Families)

World's lowest power FPGAs: Optimized for small form factor

- Static current as low as 25 uA
- World's most popular ultra low power FPGA

Control & Security FPGAs (Mach & L-ASC10 Families)

Optimized for platform management & security applications

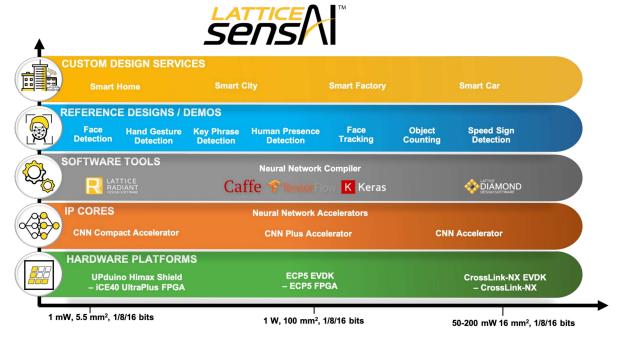

- Instant-on, non-volatile
- Highest I/O density

Solution Stack – Lattice sens Al

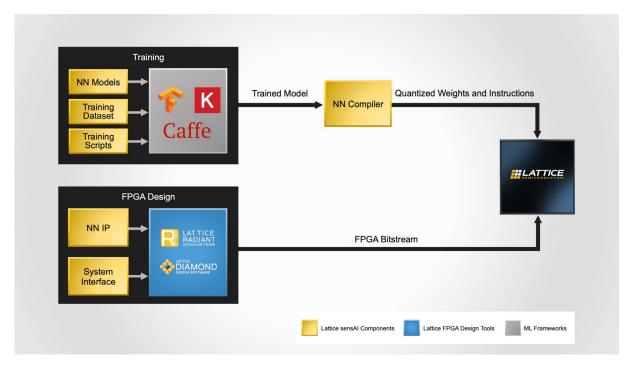

Ultra Low Power Lattice sensAl™Stack

Delivering Milliwatt AI to the Edge with Flexible FPGAs

With solutions optimized for ultra low power consumption (under 1 mW - 1 W), small package size (5.5 mm²- 100 mm²), customizable performance and accuracy, and interface flexibility (MIPI CSI-2, LVDS, GigE, etc.), the Lattice sensAI stack accelerates integration of scalable, always-on, on-device AI.

Complete technology stack for ultra low power flexible inferencing

Rapid design space exploration - Performance vs Power vs Accuracy tradeoffs

Solution Stack – Lattice sensAl

Lattice sensAl Hardware Platforms

CrossLink-NX VIP Sensor Input Board

- Key Features:
- Seamless connectivity to the Embedded Vision Development Kit
- Optimized for fast prototyping vision-based AI acceleration

Embedded Vision Development Kit

- Key Features:
- ECP5™ FPGA consuming under 1 W of power consumption
- Supports MIPI CSI-2, eDP, HDMI®, GigE Vision, USB 3.0, etc.

HM01B0 UPduino Shield

- Key Features:
- A complete development kit for implementing AI using vision and sound as sensory inputs
- iCE40 UltraPlus FPGA based Upduino 2.0 board and HiMax image sensor module

Lattice sensAIIP Cores

IP Core	OPN	Key Features
CNN Compact Accelerator	CNN-CPACCEL-UP-U	Optimized for iCE40 UltraPlus FPGA, supports variable quantization
CNN Accelerator	CNN-ACCEL-E5-U	Optimized for ECP5 FPGA, supports variable quantization
CNN Plus Accelerator	CNNPLUS-ACCEL-CNX-U	For use with CrossLink-NX FPGA, supports compact and high performance modes

Lattice sensAl Software Tools

Software Tool	Key Features
Neural Network Compiler	Supports TensorFlow, Keras and Caffe. No prior RTL experience required.

Lattice sensAl Reference Designs

Reference Design/Demo	Supported FPGA, HW Platform	Power Consumption
Human Face Identification	ECP5, Embedded Vision Development Kit	< 1 W
Object Counting	ECP5, Embedded Vision Development Kit	< 1 W
Object Counting	CrossLink-NX, CrossLink-NX VIP Sensor Input Board	200 mW
Human Presence Detection	iCE40 UltraPlus/HiMax HM01B0 UPduino Shield	< 8 mW
Key Phrase Detection	iCE40 UltraPlus, iCE40 UltraPlus Mobile Development Platform	< 8 mW

Lattice sensAl Stack Custom Design Services

Have custom Al solution needs? The senseAl stack includes an ecosystem of select, global design service partners that can deliver custom solutions for a range of end applications, including Smart Home, Smart City, Smart Factory, and Smart Cars. Please contact your local sales representative to request more information.

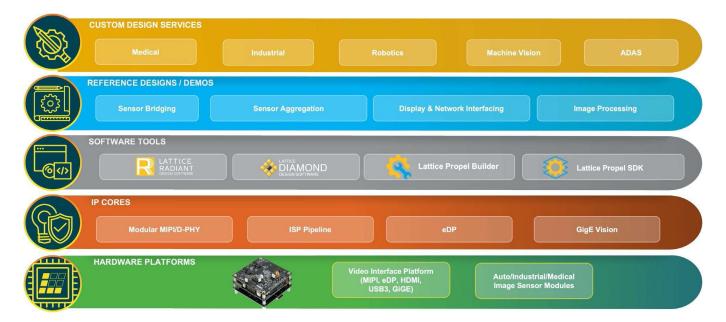

Solution Stack – Lattice mVision

Lattice mVision™ Solution Stack

Accelerate Implementation of Low Power Embedded Vision Applications

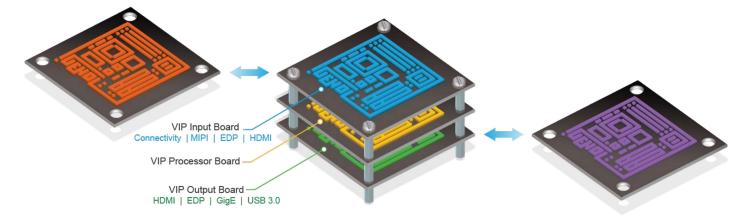

With solutions optimized for low power consumption ranging from under 150 mW to 1 W and small package size (2.5 x 2.5 mm to 10 x 10 mm) Lattice mVision solution stack provides customizable performance and flexible interface connectivity (MIPI CSI-2, LVDS, PCIe, GigE, etc.). Lattice's mVision solution stack accelerates the integration of scalable Embedded Vision solutions for Smart Factory, Machine Vision, Smart City, and Smart Home applications.

Lattice mVision Hardware Platforms

The Lattice mVision solution stack uses the award-winning Video Interface Platform (VIP) (www.latticesemi.com/vip) which is the ideal hardware for Embedded Vision designs and it provides a highly flexible, smart modular solution for Embedded Vision designers who need to build a prototyping system quickly.

Solution Stack – Lattice mVision

Lattice mVision IP Cores

CSI-2/DSI D-PHY Receiver	FPD-LINK Receiver
CSI-2/DSI D-PHY Transmitter	FPD-LINK Transmitter
Byte to Pixel Converter	Color Space Converter
Pixel to Byte Converter	Video Frame Buffer
SubLVDS Image Sensor Receiver	Gamma Corrector
	2D Scaler

Lattice mVision Partner IP

Helion IONOS Image Signal Processing (ISP)
Bitec DisplayPort IP
Helion GigE Vision IP

Lattice mVision Design Tools

Lattice's mVision solution stack uses Lattice's standard Radiant and Diamond FPGA design tools for ease of use and fast system design.

Lattice mVision Reference Designs

N Input to 1 Output MIPI CSI-2 Camera Aggregator Bridge
4 to 1 Image Aggregation with CrossLink-NX
SubLVDS to MIPI CSI-2 Image Sensor Bridge 4 to 1 Image
MIPI DSI/CSI-2 to OpenLDI LVDS Interface Bridge

Lattice mVision Demonstrations

4 to 1 Image Aggregation Demo for CrossLink-NX Image Input Board	DisplayPort Transmit Demo
2 to 1 side by side Demo for CrossLink on EVDK	Helion GigE Vision
3D Depth-Mapping	IONOS ISP from Helion
Video over USB 3.0	DisplayPort Receive Demo
Video over Ethernet	

Lattice mVision Custom Design Services

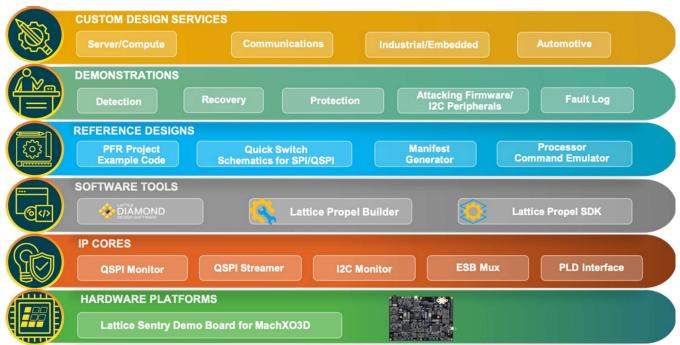

Have custom Embedded Vision solutions needs? The Lattice mVision stack includes an ecosystem of select, global design service partners that can deliver custom solutions for a range of end applications, including Factory, Smart Home, Smart City, and Smart Cars. Please contact your local sales representative to request more information.

Solution Stack – Lattice Sentry

Lattice Sentry™ Solution Stack

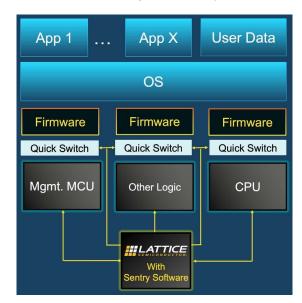

Dynamic PFR Solution for Comprehensive Coverage of NIST 800-193 Guidelines

Complete solution toolkit includes everything needed to create a custom Platform Firmware Resiliency (PFR) Implementation

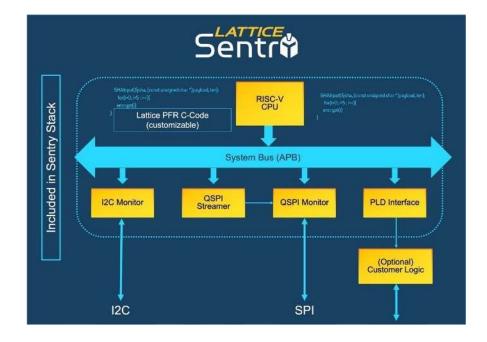

Solution allows secure protection of firmware before, during, and after system boot.

Solution Stack – Lattice Sentry

Proven Lattice Sentry IP Cores

- QSPI Streamer
- QSPI Monitor
- I²C Monitor
- PLD Interface
- Embedded Security Block Mux
- RISC-V CPU

Easy To Use Lattice Design Tools

Plug & Play Lattice Sentry Reference Designs

- PFR Project Example Code
- QuickSwitch Schematics for SPI/QSPI

- Manifest Generator
- Processor Command Emulator

Instructive Lattice Sentry Demonstrations

- Protection
- Detection
- Recovery

- Attacking Firmware/I²C Peripherals
- Fault Loc
- Implemented on Lattice Sentry Demo Board for MachXO3D

Lattice Sentry Custom Design Services

Have customized PFR needs for your design or market? The Lattice Sentry solution is fully customizable, and Lattice has a global Application Services staff who can perform custom IP development if needed. These customizations can enable a resilient PFR solution across a wide range of end applications, including Communications, Industrial, Client Computing, Automotive and Datacenter. Please contact your local Lattice sales agent to request more information.

Solution Stack – Lattice Automate

Lattice Automate™ Solution Stack

Accelerating Factory Automation

Lattice Automate[™] helps designers accelerate high performance, low power, secure solutions for next generation factory automation solutions. The stack includes modular hardware development boards and software- programmable reference designs and demos that simplify and accelerate implementation of applications like robotics, scalable multichannel motor control with predictive maintenance, and real-time industrial networking.

Hardware Platform

The Lattice Automate solution stack runs on the Certus-NX Versa development board which supports the main processing subsystem, connections to the Host PC, and also the embedded real time Ethernet links. The Motor Control nodes also utilize the Versa board.

IP Cores

- EtherConnect Enables compact, low power, modular real-time sense and control over embedded Ethernet connections
- CNN Processing Unit Provides AI accelerator for Predictive Maintenance processing
- PDM Data Collector Collects data from the Motor Control Nodes for input to the CNN Processing Unit

Design Tools

Lattice's Automate solution stack uses Lattice's standard Radiant and Diamond FPGA design tools and Lattice Propel™, enabling RISC-V based SW and HW co-processing for ease of use and fast system design.

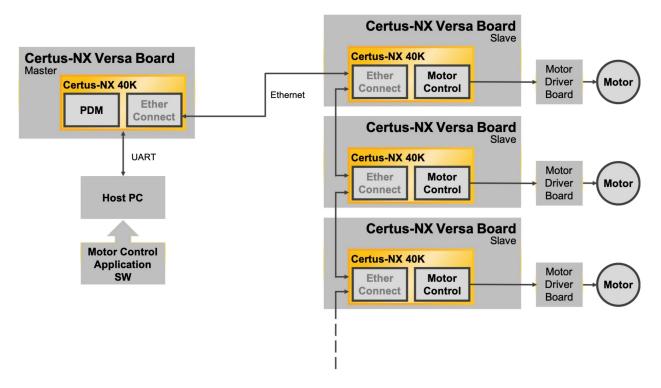

Solution Stack – Lattice Automate

Reference Designs & Demos

Multi-Channel Motor Control with Predictive Maintenance and Embedded Real Time Networking.

- Muti-Channel BLDC Motor Control
- Al enabled support for Predictive Maintenance
- Embedded Real-Time Networking
- GUI for controlling and monitoring the design

Demo Hardware

- Certus-NX Versa. Platform with 5G PCIe, SGMII, DDR3 Memory and 40k Logic Cells. Main Controller and Nodes use the Certus-NX Versa board.
- Trenz Pmod compatible motor driver board, 15A 0-30V.
- Anaheim Automation BLY17 Series Brushless DC Motor.
- HW RoT Reference Design for Cyber Resiliency using MachXO3D
 - · Demonstrate and test the ability to authenticate firmware of protected devices before boot
 - Detect and block illegal SPI and Flash operations
 - Automatically replace compromised firmware in the protected subsystem

Lattice Automate Custom Design Services

Need help putting together solutions for Factory Automation? The Lattice Automate stack includes an ecosystem of select, global design service partners that can deliver custom solutions for a range of end-applications, including factory, smart home, smart city, and smart cars. Please contact your local sales representative to request more information.

No PLL available on the 16 WLCSP, 36 ucBGA, 81 csBGA, 84 QFN and 100 VQFP packages.
 Only one PLL available on the 81 ucBGA package.
 A constant current sink available on the 16 WLCSP package only.
 Total I/Os include dedicated I/Os.

⁵⁾ Dedicated I/Os are defined to be pins that are dedicated and cannot be used by user logic after configuration.

Package is only available for E=1.2 V devices.
 Package is only available for C=2.5 V/3.3 V devices.
 Package is available for both E=1.2 V and C=2.5 V/3.3 V devices.
 When Dual Boot is disabled, image space can be repurposed as extra UFM.

⁵⁾ Dual Boot supported with external boot Flash.

⁶⁾ Dual Boot is supported by on chip dual configuration flash memory.
7) Available in automotive grade

⁸⁾ Shown in LCs

IP Cores

Lattice IP Cores are pre-tested, reusable functions, that allow designers to focus on their unique system architectures. These IP cores provide industry-standard functions such as PCI Express, DDR, Ethernet, CPRI, and embedded microprocessors. In addition, a number of independent IP providers have teamed with Lattice to offer additional high quality, reusable IP cores. Partners are selected for their industry leadership, high development standards, and commitment to customer support. For a complete listing of IP cores from Lattice and its 3rd party partners, please go to latticesemi.com/IP. Note that a Diamond Subscription License and the IP license are required to use the IP for production.

Reference Designs

Lattice Reference Designs are reusable as-is codes that allow designers to quickly build their unique applications. These reference designs provide functions such as 7:1 LVDS, Barcode Emulation, Sensor Interfacing & Preprocessing, I²C, SPI, and MIPI solutions. For a complete listing of reference designs from Lattice, please go to: www.latticesemi.com/referencedesigns.

CrossLink-NX Evaluation Board

Prototyping Board with Abundant I/O, PCIe 5G SERDES, Expansion Headers and 40k Logic Cells.

Features

- CrossLink-NX FPGA (LIFCL-40-9BG400C)
- More I/O access: 118 wide range I/O, 37 high-speed differential pair I/O, one PCIe 5G SERDES channel and most configuration pins accessible
- Expandable usability: FPGA Mezzanine Card (FMC), Raspberry Pi, Digilent Peripheral Module (Pmod™), MIPI CSI-2, D-PHY and general purpose I/O expansion headers
- USB-B connection for device programming and Inter-Integrated Circuit (I²C) utility
- On-board Boot Flash: 128 Mbit Serial Peripheral Interface (SPI) Flash, with Quad read feature
- 8 input DIP switches, 4 push buttons, 3 Status LEDs and 14 LEDs for demo purposes
- Multiple reference clock sources

Ordering Part Number

LIFCL-40-EVN

CrossLink LIF-MD6000 Master Link Board

Enables designers to streamline the development process and evaluate key connectivity features of the CrossLink FPGA.

Features

- Contains the Lattice CrossLink LIF-MD6000 in 81-ball csfBGA package
- Contains four connectors for interfacing to MIPI D-PHY and high speed programmable I/O
- Includes 0.1" header board, SMA board and LEDs for interfacing and control
- Provides easy programming interface via USB with FTDI device

Ordering Part Number

LIF-MD6000-ML-EVN

CrossLink LIF-MD6000 I/O Link Boards

Allows designers to easily interface to the LIF-MD6000 Master Link Board from a variety of signal sources and sinks using standard SMA connectors.

Features

- I/O Link Boards for use with Lattice LIF-MD6000 Master Link Board for SMA or low speed peripheral connections
- Contains one SMA board and one 0.1" header board

Ordering Part Number

LIFMD-IOL-EVN

iCE40 UltraPlus Single-Wire Aggregation Board

Enables designers to evaluate their single-wire interface to a prototype system to demonstrate a proof of concept in-system.

Features

- · No FPGA tools knowledge necessary
- Customizable via available Reference Design
- Up to 7 channels can be aggregated
- Each channel can be either I²C, I2S or GPIO
- Board set can be configured as a standalone demo or in-system proof of concept

Ordering Part Number

ICE40UP5K-SWA-EVN

Himax HM01B0 UPduino Shield

A complete development kit for implementing Artificial Intelligence (AI) using the iCE40 UltraPlus with vision and sound as sensory inputs.

Features

- Lattice UltraPlus FPGA with 5.3K LUTs, 1 Mb SPRAM, 120 kb DPRAM, 8 Multipliers
- FTDI FT232H USB to SPI Device for FPGA programming
- · 12 MHz Crystal Oscillator Clock Source
- 34 GPIO on 0.1" headers for connecting to the adapter board
- SPI Flash, RGB LED, 3.3 V and 1.2 V voltage regulators
- HM01B0 low power image sensor supports 30 fps at 1.1 mW
- · 2 I2S microphones
- Debug LEDs

Ordering Part Number

HM01B0-UPD-EVN

iCE40 UltraPlus Mobile Development Platform

Enables designers to evaluate key connectivity features of the iCE40 UltraPlus FPGA as well as processing features utilizing multiple DSPs, integrated RAM, and FPGA fabric.

Features

- x1 MIPI DSI interface up to 108 Mbps
- 4x Microphone bridging (2x I2S mics and 2x PDM mics)
- Compass sensor (LSM303), pressure sensor (BMP180), gyro sensor (LSM330), and accelerometer (LIS2D12)
- 640 x 480 Image sensor (OVM7692)
- BLE module to transfer any captured data from iCE40 UltraPlus wirelessly
- iCE40 UltraPlus can be programmed via on-board SPI Flash or via USB port

Ordering Part Number

iCE40UP5K-MDP-EVN

iCE40 UltraPlus Breakout Board

Enables designers to evaluate key connectivity features of the iCE40 UltraPlus FPGA. The breakout board brings out all I/O and allows the FPGA to be programmed over a USB connector.

Features

- iCE40 UltraPlus (iCE40UP5K) device in a 48-pin QFN package
- · High-current LED output
- iCE40UP5K application based current measurements
- Standard USB cable for device programming
- RoHS-compliant packaging and process
- Pre-loaded RGB LED Demo
- Software run GUI
- · USB Connector Cable

Ordering Part Number

iCE40UP5K-B-EVN

iCE40-HX8K Breakout Board

A simple, low-cost board with an iCE40-HX8K FPGA, and generous I/O access.

Features

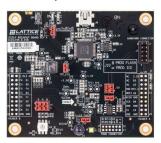

- iCE40-HX8K CT256 device
- 8 user-accessible LEDs
- SPI Flash for programming configuration
- 40-pin 0.1" header for user connectivity
- · 0.1" holes for user connectivity
- FTDI 2232H for USB interface
- 12 MHz oscillator
- Jumpers to select programming of the SPI Flash or iCE40-HX8K
- USB Type-A to Type-B (mini) cable for FPGA programming via PC
- Demo designs available for download

Ordering Part Number

ICE40HX8K-B-EVN

iCE40 Ultra Breakout Board

Featuring an ultra-small FGPA optimized for mobile applications. Typical mobile interfaces like RGB, IR and high current Torch LEDs are included, as well as access to every device I/O.

Features

- iCE5LP4K FPGA in 0.35 mm pitch, 36-ball WLCSP
- RGB LED
- · High-brightness "torch" LED
- Infrared (IR) LED
- Status LEDs
- · Access to all device I/O
- On-board 32 Mbit SPI Flash for reconfiguration
- Windows- & Mac-based GUI for interface to the RGB LED, includes FPGA source code
- USB Type-A to Type-B (mini) cable for FPGA power and programming via PC

Ordering Part Number

ICE5LP4K-B-EVN

iCE40 UltraLite Breakout Board

Featuring the world's smallest FGPA optimized for mobile applications. Typical mobile interfaces like RGB, IR and high current Torch LEDs are included, as well as access to every device I/O.

Features

- iCE40UL1K (iCE401K-CM36A) device in a 36-ball BGA package
- Layout example of a board using 0.40 mm pitch BGA package
- High current LED output
- Infrared transmit capability for remote control functions
- iCE40UL1K application-based current measurements
- Standard USB cable for device programming
- RoHS-compliant packaging and process
- Preloaded RGB LED Demo
- · Software-run GUI
- USB connector cable

Ordering Part Number

iCE40UL1K-B-EVN

iCE40 Ultra Wearable Development Platform

Peripheral and sensor-rich development platform with iCE40 Ultra and MachXO2 in a wearable watch form factor.

Features

- Approximately (WxLxH) 1.50" x 1.57" x 0.87" form factor with wrist strap
- iCE40 Ultra iCE5LP4K and MachXO2 LCMXO2-2000ZE
- LG 1.54" 240 x 240 single-lane MIPI DSI display
- Bluetooth low-energy module
- Sensors: Heart-rate/SpO2, skin temperature, pressure and accelerometer/ gyroscope
- 2 user LEDs, RGB LEDs, high-current white LED and high-current IR LED
- Stereo MEMs PDM microphones
- 32 Mbit Quad SPI-flash
- · 27 MHz Oscillator
- Power via built-in 3.7 V, 250 mAh lithiumpolymer battery or mini-USB cable

- FTDI 2232HQ USB device allows programming of FPGA and Flash
- Reference design available for download:
 - Parallel RGB to MIPI DIS bridging
- Health monitoring*
- Pedometer*
- IR transmitter*
- Flashlight*
- * Reference Android APK available to interface with mobile phone over Bluetooth

Ordering Part Number

ICE5LP4K-WDEV-EVN

iCE40LP1K Evaluation Kit

Featuring our ultra-small FPGA – 1k LUTs in a 16-ball WLCSP package (0.35 mm-ball pitch), only 1.4 mm x 1.48 mm, RGB LED control, GUI available for PC or Mac interface.

Features

- iCE40LP1K in 16-WLCSP package (0.35 mm-ball pitch)
- High current tri-color LED (RGB)
- Infrared transmit LED
- · Barcode emulation LED
- · 27 MHz on-board oscillator
- SMA connector for external clock input
- SPI configuration Flash
- USB Type-A to Type-B (mini) cable for FPGA power and programming via PC

Ordering Part Number

ICE40LP1K-SWG16-EVN

Lattice Sentry Demo Boards for MachXO3D and Mach-NX

The Lattice Sentry Demo Board for MachXO3D or Mach-NX lets you develop, demonstrate and test a NIST 800-193-compliant PFR solution on a single board, using the MachXO3D LCMXO3D-9400HC-6BG484C, or Mach-NX LFMNX-50FBG484C as a Platform Root of Trust, and two Lattice ECP5 FPGAs which act as PFR-protected ICs in the system.

Features

- MachXO3D LCMXO3D-9400HC-6BG484C
 - or
- Mach-NX FPGA LFMNX-50FBG484C
- Power Supply (12 V)
- Lattice Sentry Solution Stack PFR demo support
- Lattice Sentry system-level behavior validation
- · USB connection for device programming
- Two ECP5 FPGA devices on-board with 256 M SPI/QSPI flash devices to simulate protected external devices

Ordering Part Number

LCMXO3D-PFR-EVN

LFMNX-SENTRY-EVN

MachXO3L / MachXO3LF Starter Kit

The MachXO3L(F) Starter Kit is a basic breakout board to allow simple evaluation and development of MachXO3L(F) based designs. It includes the LCMXO3L(F)-6900C-5BG256C device.

Features

- MachXO3 FPGA LCMXO3L(F)-6900C-5BG256C
- USB Type-B (mini) connector (program/ power)
- Pre-programmed example design (available on latticesemi.com)
- Eight LEDs
- 4-position DIP switch

- 40-hole prototyping area
- Four 2 x 20 expansion header landings for general I/O, JTAG and external power
- 1 x 8 expansion header landing for JTAG
- 1 x 6 expansion header landing for SPI/ I2C
- SPI Flash for external boot or dual boot
- 3.3 V and 1.2 V supply rails

Ordering Part Number

LCMXO3L-6900C-S-EVN

LCMXO3LF-6900C-S-EVN

MachXO3L Breakout Board

Focusing on evaluating high-speed source synchronous interfaces with the Lattice MachXO3L-2100 and MachXO3L-6900 products in both 49-ball WLCSP and 256-ball caBGA packages respectively.

Features

- Two MachXO3L FPGAs
 - XO3L-6900E in 256caBGA
 - XO3L-2100E in 49WLCSP
- Two optional configurations:
 - 50-pin Harwin Archer connector for interface to DSI screen (screen not included)
 - 40 SMA connectors for LVDS I/O evaluation
- Generous prototyping/breakout access
- Switches and LEDs for user input and feedback
- Discrete resistors to support SLVS, subLVDS or DPHY Tx, and DPHY Rx, LP mode
- USB Type-A to Type-B (mini) cable for FPGA power and programming via PC
- DC jack for supplemental power input

Ordering Part Number					
MachXO3L SMA Breakout	LCMXO3L-SMA-EVN				
MachXO3L DSI Breakout	LCMXO3L-DSI-EVN				

MachXO3-9400 Development Board

The MachXO3-9400 Development Board is a full-featured board allowing the evaluation of MachXO3 in hardware management with L-ASC10 and I/O expansion applications utilizing the on-board connectors for Arduino and Raspberry Pi.

Foaturos

- MachXO3LF-9400C-484caBGA and L-ASC10 devices with multiple prototyping and breakout areas
- Arduino and Raspberry Pi development board connectors
- LEDs and switches for demos and evaluation
- On-board FTDI device supports JTAG programming and I²C Interfacing over USB cable
- Footprint support for CrossLink I/O link connectors and ASC expansion board connectors

Ordering Part Number

LCMXO3LF-9400C-ASC-B-EVN

MachXO2 Boards and Kits MachXO2 Breakout Board Features

- MachXO2 LCMXO2-7000HE
- Access to all device I/O via four 2 x 20 expansion header landings for I/O, JTAG and external power
- · 60-hole prototype area
- USB Type-B (mini) connector for power and programming (cable included)
- · Eight general purpose LEDs
- · 3.3 V and 1.2 V supply rails

MachXO2 Pico Development Kit Features

- MachXO2 LCMXO2-1200ZE
- 4-character, 16-segment LCD display
- 4 capacitive touch sense buttons
- 1 Mbit SPI Flash
- I²C temperature sensor
- · Current and voltage sensor circuits
- Expansion header for JTAG, I²C
- Standard USB cable for device programming and I²C communication
- RS-232/USB & JTAG/USB interface
- RoHS-compliant packaging and process
- · Watch battery

MachXO2 Control Development Kit Features

- MachXO2 LCMXO2-4000HC
- Power Manager II ispPAC-POWR1014A
- 128 Mbit LPDDR memory, 4Mbit SPI Flash
- · Current and voltage sensor circuits
- · SD memory card socket
- Microphone
- · Audio amplifier and Delta-Sigma ADC
- Up to two DVI sources and one DVI output.
- Up to two Display inputs (7:1 LVDS) and one Display output (7:1 LVDS)
- · Audio output channel
- Expansion header for JTAG, SPI, I²C and PLD I/O.
- · LEDs & switches
- Standard USB cable for device programming
- RS-232/USB & JTAG/USB interface
- RoHS-compliant packaging and process
- AC adapter (international plugs)

MachXO5 Development Board

The MachXO5-NX Development Board is a full-featured board allowing the evaluation of MachXO5-NX in hardware management and I/O expansion.

Features

- On board MachXO5-25 caBGA Device
- Optional SGMII, Gbe PHY RJ45 connector and Aardvark header
- HyperRAM up to 166 MHz (333 Mbyte/s, x16 bits
- ADC interface with 10K POT
- 7-Segment Blue LED, 4-position DIP Switches, 4 push buttons, and 8 red LEDs for demo
- Two Hirose FX12-40 headers and Multiple reference clock sources
- Versa Headers connection to Lattice L-ASC bridge board

Ordering Part Number

LFMXO5-25-EVN

MachXO5T-NX Development Board

The MachXO5T-NX Development Board is a full-featured board allowing the evaluation of LFMXO5-100 in hardware management and PCIe support.

Features

- Two Gbe PHY RJ45 connectors, with SGMII PHY support
- · Supports LPDDR4 upto 1066Mbps, x16 bits
- Supports PCIe Gen2 x1 Edge Connector
- Versa Headers bridge with Lattice ASC Demo Board to support L-ASC10
- General Purpose Input/Output (GPIO) interface with PMOD, Arduino and Raspberry Pi boards

Ordering Part Number

LFMXO5-100T-EVN

Certus-NX Versa Evaluation Board

Connectivity Platform with 5G PCIe, SGMII, DDR3 Memory and 40k Logic Cells.

Features

- Certus-NX FPGA (LFD2NX-40-8BG256C)
- Connectivity platform with 5G PCIe and SGMII: PCI Express 2.0 endpoint edge connector (x1 lane), two Gigabit Ethernet ports (one SGMII, one RGMII), DDR3 memory (with 1066 Mbps data rate x 16 data width) and two camera sensors (one using soft D-PHY interface, other using parallel interface)
- Efficient processing and expandable usability: Features Certus-NX low-power general purpose FPGA with 40k logic cells in a 256-BGA package. Board functions expandable via three Digilent
- Peripheral Module (Pmod™) headers available on the board
- USB-B connection for device programming and Inter-Integrated Circuit (I²C) utility
- On-board Boot Flash: 128 Mbit Serial Peripheral Interface (SPI) Flash, with Quad read feature
- Four input DIP switches, five push buttons, eight status LEDs and one 7-segment LED for customer purposes
- Multiple reference clock sources

Ordering Part Number

LFD2NX-VERSA-EVN

ECP5 Evaluation Board

Prototyping Board with Abundant Logic, I/O, 5G SERDES and Expansion Headers.

Features

- ECP5-5G FPGA (LFE5UM5G-85F-8BG381)
- More I/O access: 178 I/O (including 20 differential pair I/O), four 5G SERDES, and most configuration pins accessible
- Expandable usability: Arduino, Raspberry Pi, Digilent Peripheral Module (Pmod™), Microphone Daughter Card (MDC) and general purpose I/O expansion headers
- USB-B connection for device programming and Inter-Integrated Circuit (I²C) utility and future capability to support Improved Inter-Integrated Circuit (I3C)
- On-board Boot Flash: 128 Mbit Serial Peripheral Interface (SPI) Flash, with Quad read feature
- 8 input DIP switches, 3 push buttons and 8 LEDs for demo purposes
- · Multiple reference clock sources

Ordering Part Number

LFE5UM5G-85F-EVN

· Half-length PCI Express form factor: allows demonstration of PCI Express x1 interconnection

Electrical testing of one full-duplex SERDES channel via SMA connections

- USB Type-B connection for UART and device programming
- Two RJ45 interfaces to 10/100/1000 Ethernet to RGMII
- On-board boot Flash:128 Mbit Serial SPI Flash
- DDR3-1866 memory components (64 Mbit/x16)

- Expansion mezzanine interconnection for prototyping
- 14-segment alphanumeric display
- Switches, LEDs and displays for demo
- Diamond® programming support
- On-board reference clock sources

Ordering Part Number

LFE5UM-45F-VERSA-EVN

LFE5UM5G-45F-VERSA-EVN

LatticeECP3 Versa Development Kit

Industry's lowest cost platform for designing PCI Express and Gigabit Ethernet based systems. The kit includes free demos and reference designs.

Features

Features

- The LatticeECP3 Versa Evaluation Board: SERDES Eye Quality Demo
- PCI Express 1.1 x1 Edge connector
- Two Gigabit Ethernet ports (RJ45)
- 4 SMA connectors for SERDES access
- USB Type-B (mini) for FPGA programming
- LatticeECP3 FPGA: LFE3-35EA-FF484
- 64 Mbit Serial Flash memory
- 1GB DDR3 Memory
- 14 segment alphanumeric display
- Switches and LEDs for demos

- 4 PCI Express Demos
- Gigabit Ethernet MAC Demo using Mico32
- DDR3 Memory Controller Demo
- Available on Windows and Linux platforms
- USB Type-A to Type-B (mini) cable for FPGA programming via PC
- 12 V AC power adapter and international plug adapters

Ordering Part Number

LFE3-35EA-VERSA-EVN

LatticeXP2 Brevia2 Development Kit

Easy-to-use, low-cost platform for evaluating and designing with Lattice XP2 FPGAs.

Features

- LatticeXP2 FPGA: LFXP2-5E-6TN144C
- 2 Mbit SPI Flash memory
- 1 Mbit SRAM
- Programmed via included mini-USB Cable
- 2 x 20 and 2 x 5 expansion headers
- Push buttons for general purpose I/O and
- 4-bit DIP Switch for user-defined inputs
- 8 Status LEDs for user-defined outputs

Ordering Part Number

LFXP2-5E-B2-EVN

Embedded Vision Development Kit

Embedded Vision Development Kit with dual-camera to HDMI bridging, features CrossLink, ECP5 and Sil1136 devices. The kit's modular platform simplifies development and offers flexibility for design expansion

Features

- · All-inclusive demo system with on-board video sources
- CrossLink LIF-MD6000 input board with two Sony IMX 214 high-speed MIPI D-PHY interface camera sensors
- ECP5 processor board with pre-loaded high-definition Image Signal Processing IP
- Sil1136, non-HDCP, output board connects any HDMI

- Includes 0.1" header prototyping
- Easy programming interface via USB with FTDI device
- Modular Video Interface Platform (VIP) allows mixing and matching of input and output boards
- Develop custom video interface solutions for embedded vision and machine learning using Lattice Diamond Software

Ordering Part Number

LFXP2-5E-B2-EVN

CrossLink-NX VIP Sensor Input Board

CrossLink-NX VIP Sensor Input Board, expands multi-sensor connectivity and processing to the Embedded Vision Development Kit.

Features

- · Four on-board Sony IMX 256 image sensors
- · Three PMOD connectors for flexible sensor connectivity
- Contains the Lattice CrossLink-NX
- · Optimized for easy sensor aggregation
- Supports 4K/2K @60 fps or 1080p @60 fps
- Complements Embedded Vision Development Kit by providing for fast prototyping

Ordering Part Number

LIFCL-VIP-SI-EVN

DisplayPort VIP Input Board

DisplayPort VIP Input Board, expands video connectivity to the Embedded Vision Development Kit with the inclusion of DisplayPort RX and embedded DisplayPort RX.

Features

- Supports DisplayPort 1.4 up to 2.7 Gbps
- Integrated Texas Instruments SN75DP130
 DisplayPort 1:1 Redriver
- Mini DisplayPort (mDP) connector
- Two 60-pin rugged high-speed headers
- Modular Video Interface Platform (VIP) with eDP RX feature support
- Develop custom video interface solutions for embedded vision and machine learning using Lattice Diamond Software

Ordering Part Number

DP-VIP-I-EVN

DisplayPort VIP Output Board

DisplayPort VIP Input Board, expands video connectivity to the Embedded Vision Development Kit with the inclusion of DisplayPort TX and embedded DisplayPort TX.

eatures

- Supports DisplayPort 1.4 up to 2.7 Gbps
- Integrated Texas Instruments SN75DP130 DisplayPort 1:1 Redriver
- Mini DisplayPort (mDP) connector
- Two 60-pin rugged high-speed headers
- Modular Video Interface Platform (VIP) with eDP TX feature support
- Develop custom video interface solutions for embedded vision and machine learning using Lattice Diamond Software

Ordering Part Number

DP-VIP-O-EVN

USB3-GbE VIP IO Board

USB3-GbE VIP IO Board provides USB 3.1 and Gigabit Ethernet connectivity by converting the output of the ECP5 VIP Processor Board into a standard USB 3.1 and Gigabit Ethernet interface.

Features

- · Two Unified 60-pin high speed connectors
- On board Cypress FX3 USB 3.1 controller
- Compliant with USB 3.1 specification revision 1.0
- · Supports standard USB 3.0 interface
- On board industrial grade TI DP83867IR Gigabit Ethernet PHY
- Supports 10/100/1000 Ethernet

Ordering Part Number

USB3-VIP-EVN

Machine Learning Adapter Card

The Machine Learning Adapter Card adds external memory and microphone input to the ECP5 VIP Processor Board.

Features

- · Includes 8 GB MicroSD card
- Includes Microphone Input
- Easy connection to ECP5 VIP Processor Board, included in Embedded Vision Development Kit

Ordering Part Number

ML-ADP-EVN

HDMI VIP Input Bridge Board

The HDMI VIP Input Bridge Board complements the Embedded Vision Development Kit by providing two selectable HDMI input signals for fast prototyping. The board converts two unencrypted HDMI input video signals into a parallel RGB video format.

Features

- · 2 switchable HDMI input signal
- Contains the Lattice Sil1127A
- · Transfer of non-HDCP input data
- Support of 1080p @ 60 Hz HDMIcompliant digital audio and video
- Can be used as stand-alone board or combined with the Embedded Vision Development Kit

Ordering Part Number

HDMI-VIP-IB-EVN

Lattice USB 3.0 Video Bridge Development Kit

This is a production-ready, high-definition video capture and conversion system, based on the LatticeECP3™ FPGA family.

Features

- Production-ready USB 3.0 audio/video bridging reference design
- 1080p video streaming over USB 3.0 @60 fps
- HDMI 1.4a audio and video capture
- SD-, HD-, 3G-SDI audio and video capture
- Supports video capture from external MIPI CSI-2, SubLVDS or Parallel sensors
- Reference design provides fast USB 3.0 UVC and UAC class data packing
- Plug and play operations as a video capture device on multiple standard platforms (Windows, MacOS, Linux)
- Complete reference design schematics and documentation available

HDMI-VIP-IB-EVN

Platform Manager 2 Development Kit

The Platform Manager 2 Development Kit is a versatile, ready-to-use hardware platform for evaluating and designing with Platform Manager 2 and L-ASC10 devices. This kit includes a board, programming cable, and assorted example designs and documentation available for download. You can implement and debug your hardware management functions (power, thermal and control plane management) and test them out with this kit.

Features

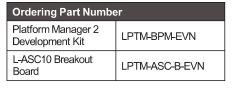

- · LPTM21 (Platform Manager 2 device) & L-ASC10 (Hardware Management expander)
- Temperature monitoring/measurement, with temperature control using fan (included)
- Fault logging under various types of hardware management faults
 - · 4 potentiometers & 2 POLs for sequencing, VID/Voltage scaling, margining, fault creation
- Background programming support with Dual boot from golden image stored on the SPI Flash
- Hardware management expansion through external L-ASC10 boards
- 3-digit LCD for additional code debug support

The L-ASC10 (ASC) Breakout Board is a versatile hardware platform for evaluation and desig with L-ASC10 devices. The board is designed to work alongside the Platform Manager 2 Development Kit.

Features

- · L-ASC10 (Hardware Management Expander)
- · 2 potentiometers for sequencing & fault creation
- 9 LEDs for sequencing
- Temperature monitor & measurement with 2 on-board temperature sensors
- Connector for use with Platform Manager 2 Development Kit

Programming Hardware

Programming Cables

Lattice Programming Cables are used to communicate between a PC and a Lattice device on a target board or system. The most common application is to program a Lattice device. Programming Cables can also be used to help debug your hardware designs via Lattice software tools.

- USB Programming Cable (HW-USBN-2B pictured). The latest-generation Programming Cable adds I²C programming and various other features.
- Parallel Cable (HW-DLN-3C). This connects to a PC parallel port and is best for basic JTAG programming.

Smart Sockets

Lattice Smart Sockets are an all-in-one solution for prototype programming of the latest Lattice products.

These complete solutions include all the functionality of a Desktop Programmer + Socket Adapter combination in a single board. All that's needed is a simple connection to your PC via USB (cable included).

More information about Lattice Smart Sockets is on the Lattice website at www.latticesmi.com/sockets.

Desktop Programmers

Lattice offers two desktop programmers for prototype programming of Lattice products.

A Socket Adapter is required for the specific device/package you wish to program. These are available separately, and are designed specifically for one Desktop Programmer or the other.

The Lattice Model 300 Desktop Programmer (pictured) supports most Lattice FPGA and CPLD products.

The iCEprog Desktop Programmer supports all Lattice iCE products.

Ordering Part Number					
Model 300 Desktop Programmer	PDS4 102-PM300N				
iCEprog Desktop Programmer	ICEPROGM1050-01				

Socket Adapters

Lattice Socket Adapters are used in conjunction with a Lattice Desktop programmer to facilitate low-volume, manual programming of Lattice devices.

Socket adapters are generally designed to support a device family/package combination.

iCE Socket Adapters work only with the iCEprog Desktop Programmer. All other Lattice Socket Adapters work only with the Model300 Desktop Programmer.

More information and a complete list of Lattice Socket Adapter products is available at www.latticesmi.com/sockets.
