

## Rack Mount Kit Assembly Instructions

### In the Kit

2 x Front plate (with studs)

2 x Side support plate

### Assembly Instructions

- 1) Remove the rubber protection from the front plate studs
- 2) Assemble the front plate and side support plate
  - a. Place the side support plate on the front plate (as shown in figure 1)
  - b. Place the Washer spring #6 on the stud (above the side plate)
  - c. Close the parts together with Nut NC6-32
  - d. Repeat actions 2.a to 2.c for the other side and front plates

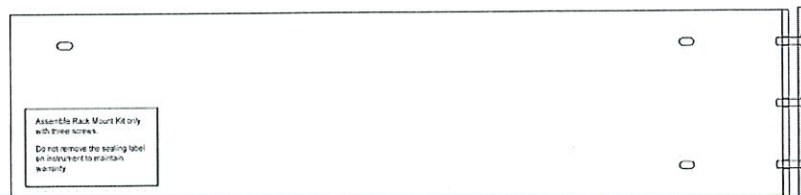

Figure 1 – Assembling the kit

- 3) Remove the available screws (six in total) from the side covers of the instrument.

**Notice:** Do not attempt to remove the Warranty Seal label, as it will void the warranty.

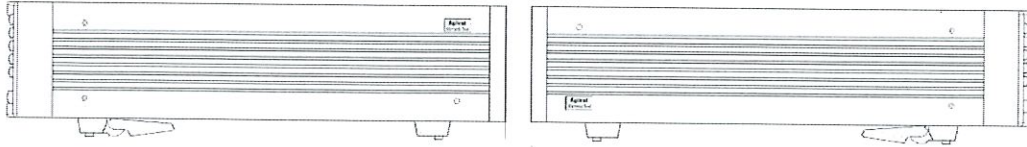

Figure 2 – Removing the screws from the instruments' covers

- 4) Assemble the side plates to the instrument
- Place a washer spring #4 on each screw NC4-40-3/8
  - Place a washer flat #4 on each screw NC4-40-3/8
  - Tighten the plates to the instrument using the screws with the washers
