

## ➡ SXXSXX-1WH2 Series

Fixed input voltage  
Unregulated single output  
DC/DC Converter

### • Product Feature

- ◎ Constant voltage input(5-24VDC±5%)
- ◎ Efficiency up to 78%
- ◎ Wide operating temperature range : -40°C~+ 85°C
- ◎ Isolation voltage 1500VDC 0.5mA 1Minute
- ◎ Single-row in-line (SIP) encapsulation
- ◎ Plastic shell flame retardant package
- ◎ Comply with the RoHS directive
- ◎ Heat dissipation mode: natural cooling
- ◎ Mean time without failure: 500000H

### • Application Area

Communication interface converter (RS232/485) cellular phone, semiconductor laser, operational amplifier power supply, portable instrument, automatic control device, etc.

## ► Overall dimensions and pin definition

SXXSXX-1WH2 Series (SIP)

11.60×6.00×10.00mm

Pin	Funcion
1	GND
2	Vin
3	OV
4	+XXVDC

Unit of size: mm[inch]

Terminal diameter tolerance: ±0.10[±0.004]

Unmarked tolerance: ±0.25[±0.010]

## ➡ Electrical Characteristics

### Electrical Characteristics

Item	Symbol	Condition except as otherwise herein provided $V_i, -40^\circ C \leq T_c \leq 85^\circ C$	Limit Value		Unit

### • Recommendation test

Filtering: In some circuits sensitive to noise and ripple, a filter capacitor can be externally connected to the input and output terminals of DC/DC to reduce ripple's impact on the system, but the value of the filter capacitance should be appropriate. If the capacitor is too large, it may cause startup problems. For each output line, under the condition of ensuring safe and reliable operation, The maximum capacity of its filtering capacitance can be referred to the external capacitance table. In order to obtain very low ripple, an "LC" filtering network can be connected to the input and output end of DC/DC converter, so that the filtering effect will be better. At the same time, it should be noted that the value of inductance and the frequency of "LC" filtering network should be staggered from the frequency of DC/DC module power supply to avoid mutual interference.

For each output line, it is recommended to see the capacitive load value (Table 1) under safe and reliable working conditions.

Table of recommended capacitive load values (Table 1)

Input Voltage (Vin+)	Input Capacitor(Cin)	Output Voltage(Vout)	Output Capacitor Cout
5V	1uF	3.3V	4.7uF
12V	4.7uF	9V	2.2uF
24V	1uF	15V	0.47uF

## ➡ Explanatory matters

### • Packing

This series module adopts shockproof and antistatic package {i Packaging.

### • Transport

The modular package is allowed to be transported by any means of transport, which shall avoid direct rain or snow and mechanical damage.

### • Store

Modules should be stored in a warehouse where the ambient temperature is -40 degrees ~ 125 degrees, the relative humidity is 10%~90%, and the surrounding environment is free from acid, alkaline and other harmful gases.

The above are the performance indicators of the product series listed in this manual. Some indicators of non-standard products may exceed the above requirements. In case of any inconsistency between the manual and the product specification documents, please refer to the specification documents.
