Universal IP67 Case

IMPORTANT UPDATE:The Universal IP67 Case will be in stock early February 2019.

No drills, all thrills.

The Universal IP67 Case is Pycom's very own universal waterproof case, with push-in tabs that fit accessory sensors perfectly, creating a water tight seal. Two holes go straight through the case without penetrating the inner compartment, meaning you can fix the case securely in place. The case features perfectly sized spacing for a Pycom expansion board or sensor shield, a Pycom module and battery, plus sensors.

Description

***** The Universal IP67 Case will be shipping from 02 February 2019   *****

No drills, all thrills.

The Universal IP67 Case is Pycom's very own universal waterproof case, with push-in tabs that fit accessory sensors perfectly, creating a water tight seal. Two holes go straight through the case without penetrating the inner compartment, meaning you can fix the case securely in place.
The case features perfectly sized spacing for a Pycom expansion board or sensor shield, a Pycom module and battery, plus sensors.

The outer dimensions of the case are: 8.8 x 8.8 x 4cm
The Universal IP67 Case has push-in tabs that specifically fit the following sensors perfectly (coming soon), as well as all of our antennas, which you can purchase separately:

- 2MP Camera
- Infrared Image Sensor
- Barcode Reader
- Fingerprint Scanner
- OLED Screen (11mm x 12mm screen area)
