

Why TimePilot Vetro?

The money savings:

- ▶ No more estimating (or guessing!) workers' hours.
- ▶ Eliminates math errors when calculating time.

The time savings:

- ▶ Payroll prep takes minutes, not hours.

The bottom line:

- ▶ TimePilot Vetro pays for itself in just weeks!

Designed and built in USA

What's an iButton?

It's a key-sized, rugged identification device that is unaffected by water and most chemicals. iButtons are more reliable than biometrics for identifying individuals and can be reassigned quickly and securely. This product comes with 10 iButtons. It can handle up to 500; just add iButtons!

When it's not being used, Vetro displays a clock on its sleek black face.

Tear up your time cards: Move up to TimePilot Vetro: On-Premise Edition

Touchscreen system plugs into your network or stands on its own

- ▶ Employees clock in and out by tapping their iButton to the clock or by entering a 4-digit code on the clock's sleek blue backlit keypad.
- ▶ No cabling needed! Mount the clock anywhere; collect your data with the included USB drive. Or plug it into your network for real-time data!
- ▶ Handles up to 500 employees—just add more iButtons.
- ▶ With the TimePilot 5 software, you can view all your employee transactions, make corrections, generate reports and prepare your data for importing into QuickBooks.
- ▶ No annual fees; 30 days of free support to get you up and running.

What's in the box?

- TimePilot Vetro time clock
- 10 iButtons
- USB Drive
- Windows-based TimePilot 5 software (download)
- Power supply
