This extender kit also supports 4:4:4 chroma subsampling for top-level PC gaming or using your HDTV as a PC monitor. While the receiver features built-in equalization, which automatically fine-tunes the image quality at the remote display with no time-consuming manual fiddling needed. Multi-Resolution Support Allows Mixing and Matching of Displays of Different ResolutionsMonitor your extended content locally by connecting an HDMI TV or display to the transmitter's local HDMI port. The B127E-1A1-HH supports multi-resolution, giving you the flexibility of connecting a 1080p or 4K at 30 Hz local display without affecting the extended 4K at 60 Hz signal.

Built-In PoC Technology Provides Receiver Power to Avoid Bulky External Power BricksBuilt-in Power over Cable (PoC) technology powers the low-profile receiver over Cat6 cable. Green and orange LEDs on both the transmitter and receiver will light up to indicate the system is receiving power and a signal is being transmitted. PoC lets you avoid the hassle of a bulky power brick and gives you the freedom to place the receiver away from an AC outlet.

Start, Stop, Fast Forward, Pause, Rewind Video from More Than 300 ft. AwayUse the included bidirectional IR cables or the included RS-232 adapters to control video and audio from the HDMI display's location. You can also connect a keyboard and mouse to the receiver's USB port to operate the video source device from up to 328 feet away from the transmitter.

Plug-and-Play Operation for Quick Setup and Immediate UseThe included transmitter and receiver units work right out of the box with no software required.
