MODEL NUMBER: B320-4X1-MHB-K

Switches between 4 multi-format (HDMI/DP/VGA/USB-C) audio/video sources all transmitting 50 ft. over Cat6 cabling to one HDMI monitor.

Features

4-Port Multi-Format Presentation Switch Connects 4 Video Sources to One HDMI DisplayThis presentation switch connects four separate source devices to your 4K television, projector or monitor's HDMI input and switches between them. It then transmits the audio/video signals through Cat6 cable to the included receiver located up to 50 feet away. HDMI, DisplayPort, USB-C and VGA + Audio inputs connect Windows laptops, cable boxes, media servers, Blu-ray players, game consoles and other sources. Switch from one source to another using the manual push buttons, RS-232 commands or the included remote control.

Suitable for a Wide Range of Audio/Video Applications for Work or PlayThis kit is recommended anywhere a variety of video signals is transmitted to a hi-def display. It is suitable for home theaters, video and multimedia presentations, or digital signage applications in classrooms, bars, restaurants, conference rooms, lecture halls, exhibition centers and trade shows.

Transmits Crystal-Clear 4K Video with HDR, 4:4:4 Color and 7.1-Channel AudioThe HDMI, DisplayPort and USB-C ports support UHD 4K resolutions up to 3840 x 2160 at 60 Hz, as well as HDR video, providing a wide range of vibrant colors with richer contrast, brighter whites and deeper blacks that pop on your 4K display. HDCP 2.2 compliance allows you to stream 4K Amazon and Netflix content with no complications. This switch also supports 4:4:4 chroma subsampling for top-level PC gaming or using your HDTV as a PC monitor. Full, rich, uncompressed DTS-HD, Dolby TrueHD and 7.1-channel digital surround sound ensure your ears receive the same treat as your eyes. The VGA port supports HD video up to 1920 x 1080 (1080p) at 60 Hz.

Remote Receiver Works Up to 50 ft. AwayThe presentation switch connects to the included passive remote receiver with a user-supplied Cat6 cable (sold separately). The pigtail-style receiver extends 4K video and digital audio signals to an HDMI display up to 50 feet (15.2 meters) away from the switch.

Built-In PoC Technology Provides Receiver Power to Avoid Bulky External Power Bricks Power over Cable (PoC) technology powers the remote receiver over Cat6 cable. Green and orange LEDs will light up to indicate the system is receiving sufficient power and a signal is being transmitted. PoC lets you avoid the hassle of a bulky power brick and gives you the freedom to place the receiver away from an AC outlet.
