

# CODEGRIP for Tiva

PID: MIKROE-3463

CODEGRIP for Tiva is a fast USB-C and WiFi programmer and hardware debugger. It supports ARM Cortex M4 based MCUs.

Universal programmer and debugger for Tiva over USB-C and WiFi

## **CODEGRIP Suite**

CODEGRIP Suite is a powerful software tool. It is used to intelligently manage programming tasks, as well as various other options and settings of the CODEGRIP.

## **Effortless programming with complete control over MCU's**

Wireless connectivity and USB-C connector allow seamless and effortless programming of a huge number of various Tiva® Cortex-M based microcontrollers, providing users with both the mobility and the complete control over the microcontroller programming and debugging process.

## **Plug and play**

USB-C debugger enables effortless programming/debugging over generic USB driver connection without the need for additional driver support.

To better understand the functions of the CODEGRIP Suite and module, please read

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

ISO 27001: 2013 certification of informational security management system.  
ISO 14001: 2015 certification of environmental management system.  
OHSAS 18001: 2008 certification of occupational health and safety management system.

ISO 9001: 2015 certification of quality management system (QMS).

## Specifications

Type	CODEGRIP
Architecture	ARM (32-bit)
Interface	USB,WiFi
Silicon Vendor	Texas Instruments
Category	CODEGRIP
