

Piezo Buzzer (14mm)

PID: MIKROE-5389

Piezo Buzzer (EPT-14A4005P) is an electronic device used to produce a tone, alarm, or sound from Sanco Electronic. This TH buzzer has a resonant frequency of 4000Hz, draws a maximum current of 2mA, and is an excellent choice for various applications including alarms and warning systems in automobiles and consumer electronics, and much more, thanks to its reliability and flexibility.

NOTE: This piezo ceramic transducer can also be found in an embedded format in combination with the BUZZ Click board™. For more information about this Click board™, visit the [BUZZ Click](#) product page.

Mikroe produces entire development toolchains for all major microcontroller architectures.

Committed to excellency, we are dedicated to helping engineers bring the project development up to speed and achieve outstanding results.

ISO 27001: 2013 certification of informational security management system.
ISO 14001: 2015 certification of environmental management system.
OHSAS 18001: 2008 certification of occupational health and safety management system.

ISO 9001: 2015 certification of quality management system (QMS).
