

EPCOS Sample Kit 2015

# Ceramic Transient Voltage Suppressors

E Series of Multilayer Varistors for ESD and High-Energy Transient Protection in Automotive Applications

# Enhanced ESD protection and high-energy transients for automotive applications

TDK Corporation has developed the new E series of EPCOS multilayer varistors, which sets a new standard in ESD and transient voltage protection for automotive applications. Based on its optimized set of materials and new coating technology the E series ensures a high level of protection and enhanced performance.

- Very low leakage current
- Enlarged operating temperature range of up to +150 °C
- No derating up to +150 °C
- Available in EIA case sizes 0402 up to 2220 with operating voltage ranges of 14 V up to 40 V

## Benefits for customer applications

- Bidirectional protection for ESD and high-energy transients
- Low capacitance types for bus systems
- EMI/RFI attenuation
- High signal integrity due to low non-linearity → no signal distortion
- High energy handling capability
- Low parasitic inductance
- Short response time of < 0.5 ns

## Qualification and protection standards

- Qualification based on AEC-Q200 Rev-D
- ESD protection up to 25 kV according to IEC 61000-4-2 and ISO 10605
- Transient protection according to ISO 7637-2
- Load dump protection according to ISO 16750-2
- Jump start capability

## Applications

- Data bus systems
- Infotainment
- Safety
- Body control and comfort
- Battery lines

**More details and applications under [www.epcos.com/mlv\\_automotive](http://www.epcos.com/mlv_automotive)**

**Important information:** Some parts of this publication contain statements about the suitability of our products for certain areas of application. These statements are based on our knowledge of typical requirements that are often placed on our products. We expressly point out that these statements cannot be regarded as binding statements about the suitability of our products for a particular customer application. It is incumbent on the customer to check and decide whether a product is suitable for use in a particular application. This publication is only a brief product survey which may be changed from time to time. Our products are described in detail in our data sheets. The *Important notes* ([www.epcos.com/ImportantNotes](http://www.epcos.com/ImportantNotes)) and the product-specific *Cautions and warnings* must be observed. All relevant information is available through our sales offices.
