Elpress tube terminals KRFS

- with extra narrow palms

KRFS

The Elpress KRFS series is a new tube terminal with extra narrow palms and is available in sizes from 50-300 mm². The palm has the same or smaller width as the tube diameter, enabling pre-installation of terminals through cable glands.
In order to enable installation in confined areas, the terminal palm on a KRFS connection has a smaller surface area than a KRF standard connection.

Terminals with narrower palm can be required when connecting certain components, such as switches.

PROPERTIES:

- for stranded or flexible Cu conductors Class 2-6
- designed for confined spaces
- easy to install with threaded cable glands
- enables pre-installation
- Cu 99.95%, tinned Cu/Sn
- inspection hole
- the use of the Elpress crimping system enables a connection tested according to requirements in IEC 61238:1
- compatible with Elpress KRF crimping system

*palm slightly wider than the tube diameter, (14,5 mm).
**palm slightly wider than the tube diameter, (17 mm).

KRF – KRFN – KRFS

Elpress standard KRF terminal, KRFN with slightly narrower palm, and the new KRFS with extra narrow palm.

The palm has the same width as the tube, which enables pre-installation of cable terminals through cable glands.
