

NB3N200S

3.3 V Differential Multipoint Low Voltage M-LVDS Driver Receiver

Description

The NB3N200 is a pure 3.3 V supply differential Multipoint Low Voltage (M-LVDS) line Driver and Receiver. NB3N200S is TIA/EIA-899 compliant. NB3N200S offers the Type 1 receiver threshold at 0.0 V.

These devices has a Type-1 receiver that detect the bus state with as little as 50 mV of differential input voltage over a common-mode voltage range of -1 V to 3.4 V. The Type-1 receivers have near zero thresholds (± 50 mV) and exhibit 25 mV of differential input voltage hysteresis to prevent output oscillations with slowly changing signals or loss of input.

NB3N200S supports Simplex or Half Duplex bus configurations.

Features

- Low-Voltage Differential 30 Ω to 55 Ω Line Drivers and Receivers for Signaling Rates Up to 200 Mbps
- Type-1 Receivers Incorporate 25 mV of Hysteresis
- Meets or Exceeds the M-LVDS Standard TIA/EIA-899 for Multipoint Data Interchange
- Controlled Driver Output Voltage Transition Times for Improved Signal Quality
- -1 V to 3.4 V Common-Mode Voltage Range Allows Data Transfer With up to 2 V of Ground Noise
- Bus Pins High Impedance When Disabled or $V_{CC} \leq 1.5$ V
- M-LVDS Bus Power Up/Down Glitch Free
- Operating range: $V_{CC} = 3.3 \pm 10\%$ V (3.0 to 3.6 V)
- Operation from -40°C to 85°C.

ORDERING INFORMATION

See detailed ordering and shipping information in the package dimensions section on page 17 of this data sheet.

- Pb-Free SOIC 8 Package
- These are Pb-Free Devices

Applications

- Low-Power High-Speed Short-Reach Alternative to TIA/EIA-485
- Backplane or Cabled Multipoint Data and Clock Transmission
- Cellular Base Stations
- Central-Office Switches
- Network Switches and Routers

Table 4. MAXIMUM RATINGS (Note 2)

Symbol	Parameter	Condition 1	Condition 2	Rating	Unit
V _{CC}	Supply Voltage			-0.5 ≤ V _{CC} ≤ 4.0	V
V _{IN}	Input Voltage	D, DE, \overline{RE}		-0.5 ≤ V _{IN} ≤ 4.0	V
		A, B (200, 204)		-1.8 ≤ V _{IN} ≤ 4.0	
		A, B (202, 205)		-4.0 ≤ V _{IN} ≤ 6.0	
I _{OUT}	Output Voltage	R Y, Z, A, B		-0.3 ≤ I _{OUT} ≤ 4.0 -1.8 ≤ I _{OUT} ≤ 4.0	V
T _A	Operating Temperature Range, Industrial			-40 to ≤ +85	°C
T _{stg}	Storage Temperature Range			-65 to +150	°C
θ _{JA}	Thermal Resistance (Junction–to–Ambient)	0 lfpm	SOIC–8	190	°C/W °C/W
		500 lfpm		130	
θ _{JC}	Thermal Resistance (Junction–to–Case)	(Note 3)	SOIC–8	41 to 44	°C/W
T _{sol}	Wave Solder			265	°C
P _D	Power Dissipation (Continuous)	SOIC–8	T _A = 25°C	725	mW mW/°C mW
			25°C < T _A < 85°C	5.8	
			T _A = 85°C	377	

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

- Maximum ratings applied to the device are individual stress limit values (not normal operating conditions) and not valid simultaneously. If stress limits are exceeded device functional operation is not implied, damage may occur and reliability may be affected.
- JEDEC standard multilayer board – 2S2P (2 signal, 2 power).

Table 5. DC CHARACTERISTICS V_{CC} = 3.3 ±10% V (3.0 to 3.6 V), GND = 0 V, T_A = -40°C to +85°C (See Notes 4, 5)

Figure 15. Equivalent Input and Output Schematic Diagrams

APPLICATION INFORMATION

Receiver Input Threshold (Failsafe)

The MLVD standard defines a type 1 and type 2 receiver. Type 1 receivers include no provisions for failsafe and have their differential input voltage thresholds near zero volts.

Type 2 receivers have their differential input voltage thresholds offset from zero volts to detect the absence of a voltage difference. The impact to receiver output by the offset input can be seen in Table 9 and Figure 16.

Table 9. RECEIVER INPUT VOLTAGE THRESHOLD REQUIREMENTS

Receiver Type	Output Low	Output High
Type 1	$-2.4 \text{ V} \leq \text{VID} \leq -0.05 \text{ V}$	$0.05 \text{ V} \leq \text{VID} \leq 2.4 \text{ V}$

NB3N200S

Figure 16. Receiver Differential Input Voltage Showing Transition Regions by Type

Live Insertion/Glitch-Free Power Up/Down

The NB3N200 family of products provides a glitch-free power up/down feature that prevents the M-LVDS outputs of the device from turning on during a power up or power down event. This is especially important in live insertion applications, when a device is physically connected to an M-LVDS multipoint bus and V_{CC} is ramping.

While the M-LVDS interface for these devices is glitch free on power up/down, the receiver output structure is not.

Figure 17 shows the performance of the receiver output pin, R (CHANNEL 2), as V_{CC} (CHANNEL 1) is ramped. The glitch on the R pin is independent of the RE voltage. Any complications or issues from this glitch are easily resolved in power sequencing or system requirements that suspend operation until V_{CC} has reached a steady state value.

Figure 17. M-LVDS Receiver Output: VCC (CHANNEL 1), R Pin (CHANNEL 2)

Simplex Theory Configurations: Data flow is unidirectional and Point-to-Point from one Driver to one Receiver. NB3N200SDG, NB3N202SDG, NB3N204SDG, and NB3N205SDG devices provide a high signal current allowing long drive runs and high noise immunity. Single

terminated interconnects yield high amplitude levels. Parallel terminated interconnects yield typical MLVDS amplitude levels and minimizes reflections. See Figures 18 and 19. A NB3N200SDG, NB3N202SDG, NB3N204SDG, and NB3N205SDG can be used as the driver or as a receiver.

Figure 18. Point-to-Point Simplex Single Termination

Figure 19. Parallel-Terminated Simplex

Simplex Multidrop Theory Configurations: Data flow is unidirectional from one Driver with one or more Receivers and Multiple boards are required. Single terminated interconnects yield high amplitude levels. Parallel terminated interconnects yield typical MLVDS amplitude levels and minimizes reflections. On the Evaluation Test

Board, Headers P1, P2, and P3 may be used as need to interconnect transceivers to a each other or a bus. See Figures 20 and 21. A NB3N200SDG, NB3N202SDG, NB3N204SDG, and NB3N205SDG can be used as the driver or as a receiver.

NB3N200S

Figure 20. Multidrop or Distributed Simplex with Single Termination

Figure 21. Multidrop or Distributed Simplex with Double Termination

Half Duplex Multinode Multipoint Theory Configurations: Data flow is unidirectional and selected from one of multiple possible Drivers to multiple Receives. One “Two Node” multipoint connection can be accomplished with a single evaluation board. More than Two Nodes requires multiple evaluation test boards. Parallel terminated interconnects yield typical MLVDS amplitude levels and minimizes reflections. Parallel terminated

interconnects yield typical LMVDS amplitude levels and minimizes reflections. On the Test Board, Headers P1, P2, and P3 may be used as need to interconnect transceivers to each other or a bus. See Figure 22. A NB3N202SDG, NB3N204SDG, and NB3N205SDG can be used as the driver or as a receiver. Full duplex bus interconnect configurations are possible using NB3N202SDG or NB3N205SDG.

 5. DIMENSION D DOES NOT INCLUDE DAMBAR PROTRUSION. ALLOWABLE DAMBAR PROTRUSION SHALL BE 0.127 (0.005) TOTAL IN EXCESS OF THE D DIMENSION AT MAXIMUM MATERIAL CONDITION.
 6. 751-01 THRU 751-06 ARE OBSOLETE. NEW STANDARD IS 751-07.

DIM	MILLIMETERS		INCHES	
	MIN	MAX	MIN	MAX
A	4.80	5.00	0.189	0.197
B	3.80	4.00	0.150	0.157
C	1.35	1.75	0.053	0.069
D	0.33	0.51	0.013	0.020
G	1.27 BSC		0.050 BSC	
H	0.10	0.25	0.004	0.010
J	0.19	0.25	0.007	0.010
K	0.40	1.27	0.016	0.050
M	0°	8°	0°	8°
N	0.25	0.50	0.010	0.020
S	5.80	6.20	0.228	0.244

SOLDERING FOOTPRINT*

*For additional information on our Pb-Free strategy and soldering details, please download the ON Semiconductor Soldering and Mounting Techniques Reference Manual, SOLDERRM/D.

GENERIC MARKING DIAGRAM*

XXXXXX = Specific Device Code
 A = Assembly Location
 L = Wafer Lot
 Y = Year
 W = Work Week
 ■ = Pb-Free Package

XXXXXX = Specific Device Code
 A = Assembly Location
 Y = Year
 WW = Work Week
 ■ = Pb-Free Package

*This information is generic. Please refer to device data sheet for actual part marking. Pb-Free indicator, "G" or microdot "•", may or may not be present. Some products may not follow the Generic Marking.

DESCRIPTION:	SOIC-8 NB	PAGE 2 OF 2

onsemi and **ONSEMI** are trademarks of Semiconductor Components Industries, LLC dba **onsemi** or its subsidiaries in the United States and/or other countries. **onsemi** reserves the right to make changes without further notice to any products herein. **onsemi** makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does **onsemi** assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. **onsemi** does not convey any license under its patent rights nor the rights of others.

onsemi, **Onsemi**, and other names, marks, and brands are registered and/or common law trademarks of Semiconductor Components Industries, LLC dba "**onsemi**" or its affiliates and/or subsidiaries in the United States and/or other countries. **onsemi** owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of **onsemi**'s product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. **onsemi** reserves the right to make changes at any time to any products or information herein, without notice. The information herein is provided "as-is" and **onsemi** makes no warranty, representation or guarantee regarding the accuracy of the information, product features, availability, functionality, or suitability of its products for any particular purpose, nor does **onsemi** assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using **onsemi** products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by **onsemi**. "Typical" parameters which may be provided in **onsemi** data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. **onsemi** does not convey any license under any of its intellectual property rights nor the rights of others. **onsemi** products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use **onsemi** products for any such unintended or unauthorized application, Buyer shall indemnify and hold **onsemi** and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that **onsemi** was negligent regarding the design or manufacture of the part. **onsemi** is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
