Description

OMNI650LCD Line-Interactive Digital UPS System offers voltage regulation, surge suppression and long-lasting battery support for personal computers, home entertainment systems and media centers. Internal UPS circuits support entry-level PCs for up to 40 min. or individual VCR/DVR components for as long as two hours during power failures. Prevents data loss, viewing interruptions, lost recordings and loss of component programming. Automatic Voltage Regulation (AVR) circuits regulate brownouts as low as 89V back to usable levels without consuming battery power. Offers complete power protection in an attractive black tower configuration. Includes four battery-supported/surge-protected outlets, plus four additional surge-suppression-only outlets for items not requiring battery support. USB port enables optional unattended system shutdown without data loss in case of extended power failure. PowerAlert® software available via free download. HID-compliant USB interface enables integration with built-in power management and auto shutdown features of Windows and macOS. Built-in audible alarm and large LCD front-panel voltage display indicates line power status, battery power status, battery low/replace status and voltage boost operation. The LCD display includes a dimmer switch and can be rotated for easy viewing in any application. 650VA/350W power handling ability supports entry-level PCs, home entertainment systems, network workstations and audio/video components. Offers 3.2 minutes battery runtime with a full load of 650VA/350W and 12 minutes with a half load of 325VA/175W. Supports user battery replacement via built-in access panel.
