

USB – RS485 serial port adapter, 4-wire interface (symmetric). An advanced 4-wire USB to serial RS485 / RS422 port converter for communication up to 4000 ft distance, and max. 115kbps transfer speed.

If you need an asymmetric 2-wire RS485 connection, we recommend our CH340-based 2-wire RS485 USB interface.

We recommend downloading [the required USB driver](#) for your operating system from WCH official website.
