MODEL NUMBER: **SUINT3000RTXL3U**

### Description

Tripp Lite's SUINT3000RTXL3U UPS System offers complete power conditioning and battery support for critical file servers and internetworking equipment in a versatile 3U rack/tower configuration. Offers compatibility with 200/208/220/230/240V applications at 50/60Hz. Double conversion power conditioning process removes line noise, voltage fluctuations and frequency variations by converting incoming AC to DC, then back to universally compatible pure sine wave AC output. Standard internal batteries offer seamless support of connected equipment during power failures with zero transfer time. Support through extended power failures is available with the addition of 2U rack/tower compatible battery packs BP72V15-2U (limit 1), BP72V28RT-3U (multi-pack compatible) and BP72V18-2US (multi-pack compatible). Maintains continuous output over an input range of 160 to 275V without depleting battery reserves. Brownout support extends to 130V when loaded to 70% or less. Intelligent DB9 monitoring port works with PowerAlert software, available via free download, for unattended shutdown and remote monitoring of UPS and site power conditions. Network accessory slot houses optional network management card options. Includes 10 outlets total, 8 of which are arranged in two customized load management banks that can be remotely powered off and on via software interface to reboot locked equipment or extend battery runtime for more critical equipment by shedding non-essential loads. C20 input connection accepts a variety of detachable cordsets to match country- or site-specific wall receptacles. 3000VA/2400W power-handling ability with full CE rating and Class A EMI/RFI rating supports a wide range of file servers and internetworking equipment, plus other sensitive loads requiring full-time power conditioning, regulation and battery support. Compatible with Tripp Lite's WatchDog system service software.
