

9311 MICRO TWEEZERS WITH REMOVABLE TIPS

Product Description

These 60W micro tweezers are perfect for smaller SMD work where the macro tweezers can't quite fit. Features include ergonomic grips and a handle designed for both left and right-hand use. The high power composite heating element heats up and recovers quickly so you can keep working. Tips can easily be swapped out to accommodate a variety of component package sizes.

Key Features

- Micro Tweezers for small surface mount and through-hole jobs.
- High power 60W composite heating element with fast recovery.
- Temperature up to 400 degrees Celsius.
- Ergonomic soft handle grips comfortable for extended soldering sessions.
- Removable tips that are available in various sizes to suit the work being done.
- For use with selected Aoyue Soldering Stations included the 9378 PRO and 952.

Package Contents

- A09311 Micro Tweezers
- AOTWE-3 Tips for Micro Tweezers (3mm)

Replacement Tips (Sold Separately)

- 1mm (**AOTWE-1**) – Best for SMT components with solder pad footprints between 0.5 - 3mm
- 3mm (**AOTWE-3**) – Best for SMT components with solder pad footprints between 1 - 5mm
- 6mm (**AOTWE-6**) – Best for SMT components with solder pad footprints between 4 - 10mm

Specifications

Micro Tweezers

Power Consumption

60W (Peak)

Temperature Range

Up to 400°C / 752°F.

Output Voltage

24V

Heating Element

Composite Heater
