

328 WORKING PLATFORM

Product Description

This working platform is constructed entirely from anti-static materials solving the problem of short circuits caused by common iron sheet platform designs.

Key Features

- Step-less screw clamp table for holding the circuit board steady.
- High-position table design effectively protects the tabletop from being damaged by hot air.
- The platform will hold boards that are up to 3" wide and 8" long.

Additional Information

- This product is RoHs compliant.
