#### **FEATURES**

- Hyper fast and soft recovery time
- Low forward voltage drop
- 175 °C maximum operating junction temperature
- Low leakage current
- True 2 pin package
- AEC-Q101 qualified
- FREE • Material categorization: for definitions of compliance please see www.vishay.com/doc?99912

### **DESCRIPTION / APPLICATIONS**

Ultra low V<sub>F</sub>, soft-switching hyper fast rectifiers optimized for discontinuous (critical) mode (DCM) power factor correction (PFC).

The minimized conduction loss, optimized stored charge and low recovery current minimized the switching losses and reduce over dissipation in the switching element and snubbers.

The device is also intended for use as a freewheeling diode in power supplies and other power switching applications.
